## **10. AAC WG2 Work Programme**

Presentation by the secretariat

## 10. AAC WG2 Work Programme

### Contribution on the document:

**Good environmental practices in low-trophic farming:** this could also be linked to the work on AAM - as Guidance Documents on Environmental Performance should be published on this during the next year, with a scope to include low trophic (i.e. they are not just finfish docs - they should detail best practice for shellfish / algae too...)

**WG2 –  
Shellfish  
Issues  
11.06.2024**

**Coming up next:**

**Approval of Work  
Programme for 2024-  
2025**

## 10. AAC WG2 Work Programme

**WG2 –  
Shellfish  
Issues  
11.06.2024**

**Coming up next:**

**Approval of Work  
Programme for 2024-  
2025**

### Contribution on the document:

**Nature-based solutions for aquaculture low-trophic farming:** I would agree that NBS is important but I do not think we need to limit to low trophic - by addressing low trophic, IMTA and other aspects of NBS+ we can extend to the whole sector.
